

SUSTAINABILITY COMPETENCY CENTER.

Business, Technical and
Functional Acceleration

PCGSERVICES.COM

SUSTAINABILITY. NOW.

ACCELERATING SUSTAINABILITY SUCCESS.

Expertise, knowledge repository, program support and resource pool to predictably ensure Industry 4.0, digital transformation and business sustainability success.

WHY A COMPETENCY CENTER?

Adopting and supporting new technology within a business is hard work. There are challenges around internal inertia, knowledge gaps, time allocation and the disruption that change creates.

What is needed is a way to smooth technology adoption, development and support bumps while increasing internal knowledge and skills to fully use new functionality and capability to do their jobs better and increase business performance.

PCG overcomes these challenges for businesses with our Competency Center—India.

MAKING SUCCESS EASY.

The PCG Competency Center—India (CCI) is an independent resource that allows you to focus on your core business, without interruption, by providing necessary and skilled development and support resources that compliment your internal teams to deliver operational success, business sustainability and competitive advantage to your company.

The CCI “works while you sleep,” around the clock, developing, testing and implementing the solutions you need, localized to your unique requirements.

The bottom line? Your IT resources remain focused on your most important business needs, while the CCI cost-effectively and securely lowers risk by:

- Reducing stoppages due to resolution delays
- Increasing confidence with the right support skill and experience
- Eliminating support turnover challenges

PCG's CCI is specially staffed, managed and developed around issues of business sustainability, Industry 4.0 success and acceleration of digital transformation success, everywhere in the world.

CCI enables your business technology project and support success, while getting you to Industry 4.0 and business sustainability advantage.

Cost Effectiveness: You save money and time associated with the development, rollout, support and ongoing optimization of your enterprise software environments.

Shared Responsibility: IT leaders don't have to do everything. PCG takes on the support areas you don't want to, sharing the support burden while keeping your business open, operational and optimized.

Scalability and Flexibility: You are able to meet compressed project and support resolution timelines with round-the-clock capability, expert resources, geographic localization and cultural integration.

Tighter Business Focus: Align your internal resources with your greatest business priorities, focusing on the core business, without the distraction of ancillary support issues getting in the way.

Lowered Business Risk: The business remains open and secure through fewer work stoppages, faster and better support resolution, no IT turnover gaps and the information and process security protocols you require.

Rely on our Competency Center—India to take the hassle, distraction, time and cost associated with keeping your enterprise technology operating at it's best, your users working at peak performance and keeping IT focused on your core business for new business advantage.
