

PREDICTABILITY

for automotive manufacturing

Technology services that solve the biggest automotive challenges. Solutions that advance automotive business sustainability and resiliency.

End-to-end **OPERATIONAL ENABLEMENT**

Our industry experts, platforms, processes, services, and solutions overcome complex automotive challenges to improve contract performance, regulatory compliance, operational performance, and customer satisfaction.

AUTOMOTIVE MANUFACTURING

AUTOMOTIVE CHALLENGES.

For automotive businesses to achieve sustainability and resiliency, they must quickly and cost effectively address:

- Modernization & Consolidation
- Increased Supply Chain Complexity
- Shipping from Scan to Verify through EDI
- Sequencing: Sequence to Build to Racks & Slots
- Reference-based Customer Requirements
- Complex Planning and Production Needs
- Shifting and Complex Regulatory Environment
- Advanced Product Quality Planning (APQP)

THE AUTOMOTIVE SOLUTION.

PCG outperforms its peers through our unique evaluation, consulting and implementation accelerators, our deep and direct Automotive industry experience, strong project methodologies and our rigorous attention to bringing in projects on-time and on-budget. Every time.

Explore our specific services areas designed around your automotive business—no matter the Tier you participate in. We're certain you'll find something that addresses an immediate and urgent need.

SUPPLY CHAIN INTEGRATION

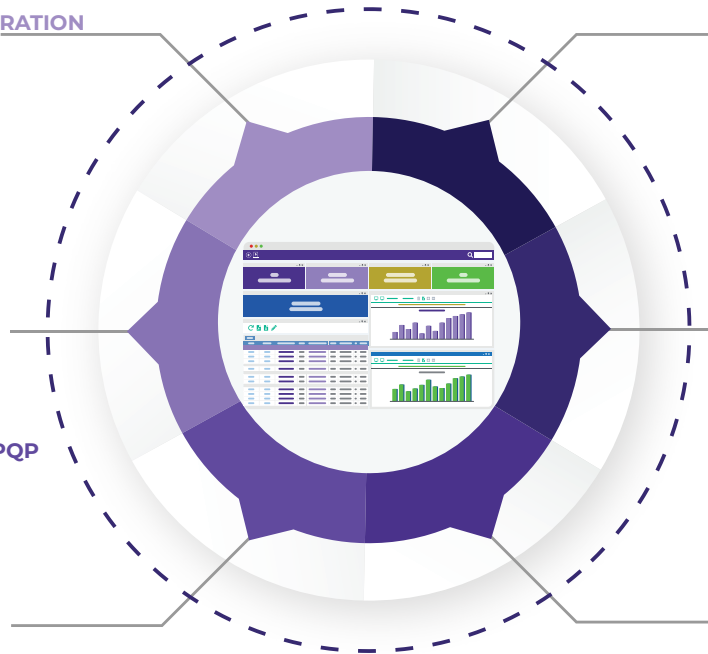

Connecting partners, linking inventory, simplifying the accounts payable and receivable processes for better collaboration, performance and transparency while accelerating inventory and lowering cost.

REGULATORY COMPLIANCE

Break the circle of conflict materials while always maintaining ROHS/REACH, ISO, IATF, MMOG/LE and Sarbanes Oxley compliance in a way that lowers business risk and cost.

PLANNING, PRODUCTION AND APQP

Gain accuracy and visibility, easily adapt to customer mandates, smoothly sequence and keep things lean. Keep ahead of planning/smoothing, last minute changes, line side labeling, and produce vs. ship sequences. And, always have a single source of truth across all APQP processes and efforts.

MODERNIZATION

Tools, methodologies, technologies, expertise, skill and experience to address issues of legacy systems, hard-to-adopt requirements, customer portals and Release Management demands.

SHIPPING

Easily overcome shipping, labeling, paperwork, logistics and EDI challenges to error-proof inventory acceptance, fix ASN problems and keep products moving.

SEQUENCING & REFERENCING

Quickly and effectively comply with JIS requirements, adapt to incoming production requirements and accurately sequence. Also, stay ahead of Reference-based Customer labeling and rules to reduce error and cost.

Reduce Forecasting Timelines | Reduce Program Planning Timeframes | Have a Single Version of Truth | Lower Overhead Costs | Grow Customer Centricity | Deliver Mobility | Engage a Changing Workforce | Line Side Label Process Improvement | Implement Visible & Transparent Supply Chains | Shorten Lead to Cash | Individual Product Offerings | Increase Production at a Lower Cost | Increase Customer Satisfaction | Increase Revenue | Grow Productivity
