ADVANCED BUSINESS RESILIENCY.

“IT as a utility” drives business sustainability by bringing new “power on demand” to information, process, user and customer experience and cost control—without rewiring.

THE RESILIENCY CHALLENGE.

Business, market, customer and partner requirements constantly change. So do worldwide events that impact supply chain, operations and profitability.

Legacy, on-premise solutions, created for on “one point in time” requirements can’t easily and quickly adapt to new need without substantial cost, disruption and resource.

THE SUSTAINABLE IT UTILITY

PCG delivers business sustainability and resiliency through a full suite of services and technology options, all designed to remove the hassle, cost and time associated with “on premise” IT systems. You run your business, we run IT.

1. Infrastructure Resiliency

- Scalability
- Security, protection
- Flexibility, adaptability
- Simple, modular

2. Performance Resiliency

- Employees, contractors
- Supply chain
- Equipment
- Collaboration
- Accountability

3. Decision Resiliency

- Trusted information
- Reporting accuracy
- Responsiveness

4. Experience Resiliency

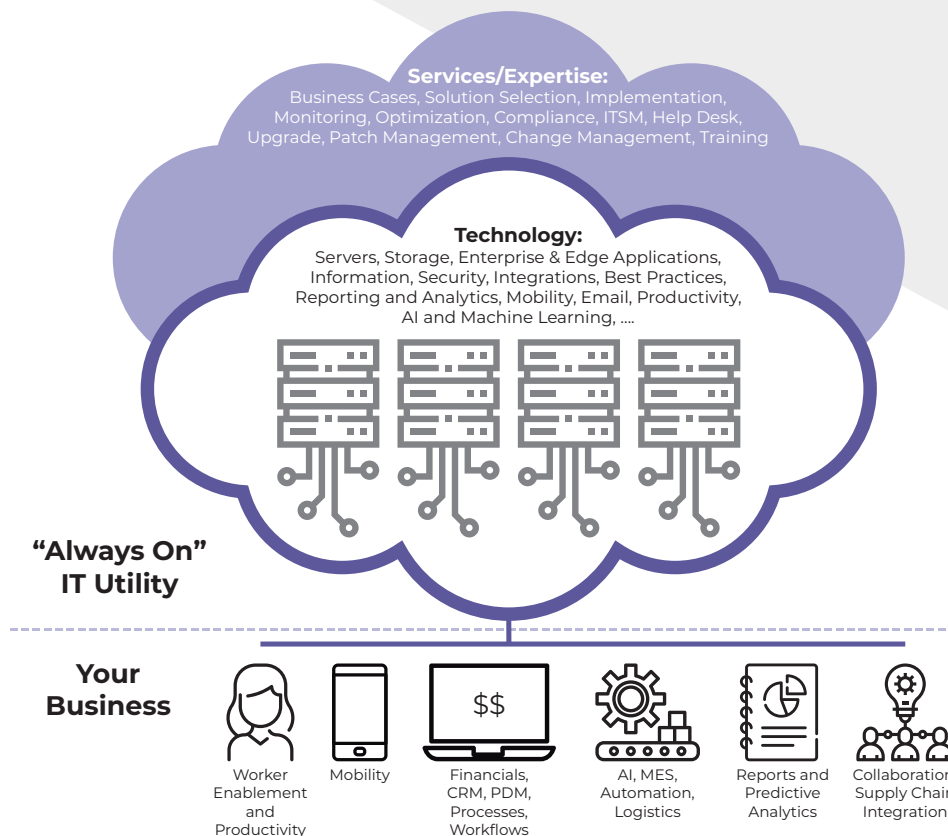

- Mobility, remote
- End-to-end integration
- Transparency
- Processes, capability

5. Balance Sheet Resiliency

- Business continuity
- Cost predictability
- Profit protection

6. Event Resiliency

- Swift identification, prioritization, response
