THE ONLY BUSINESS SAAS

Traditional SaaS is a technology solution to a technical problem.

Sustainability as a Service is a business solution to a business need. It's only from PCG.

THE BUSINESS CHALLENGE.

Businesses seek to achieve the greatest flexibility, scalability and ability to respond to customer need.

In the past, technology often stood in the way of business due to closed, proprietary or rigid architectures.

Software as a Service and the cloud changed all this, by delivering a new, full range of options to business. Both have become mainstream within business and IT due to cost effectiveness.

Might there a better solution available to business?

ONE-HALF A SOLUTION?

To put it plainly, traditional SaaS and the cloud are "one-half a solution" to fulfilling business requirements.

Traditional SaaS is a technology solution to a licensing challenge. SaaS is a software licensing and delivery model whereby businesses subscribe to software and functionality, utilizing what is needed, when and where it's needed.

The cloud is a technology answer to an IT challenge. The cloud allows business to eliminate traditional on-premise investment in IT to gain the same, or better, access to applications, functionality, technology management, performance and support, also in a subscription manner.

Unfortunately, SaaS and cloud only solve technology problems. What about the business?

**DON'T RISK YOUR BUSINESS
ON HALF A SOLUTION.**

THE NEW SAAS.

The new SaaS delivers what the business needs to support the business. The new SaaS is a business answer to a business need—focusing on your business where it is and where it needs to be.

Only from PCG, the new SaaS puts business in control, delivering business sustainability in the cloud for maximum flexibility from strategy to optimization.

Your company's mission and vision, strategies and actions, accounting, operations management and reporting to run in the cloud. We call it:

Sustainability as a service is the promise of digital and business transformation realized.

Sustainability as a Service is the only complete, business-driven SaaS solution available.

REAL BUSINESS FREEDOM.

Your business has sustainable opportunity, capital, performance and outcome freedom through application of decades of experience and skill in your industry, business and process requirements and expert product knowledge on these platforms:
